

PIGEON AFFECTED WITH POX

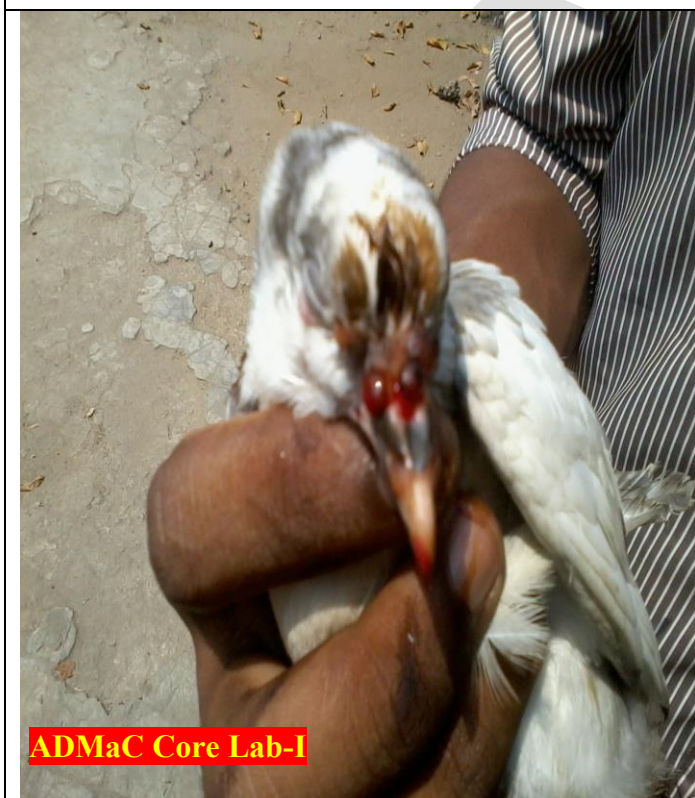

How To Diagnose:

 <p>P.C. Dr.Parikshit</p>	<p>Lesions appear chiefly around the peri-orbital areas, nares, digits and conjunctiva.</p>
 <p>P.C. Dr.Parikshit Kakati</p>	<p>In severe cases, secondary bacterial infection causes rupture of the vesicle and pus formation.</p>

P.C. Dr.Parikshit Kakati

Usually, squabs are affected during nestling stage.

ADMaC Core Lab-I

Birds are unable to eat and drink and in severe cases, mortalities are also recorded.
